SUMMARY

Frontend Developer with 4+ years of experience building web applications and e-commerce platforms with JavaScript, TypeScript, Vue.js, and Nuxt. Experienced in component-based architecture with Vue 3 Composition API and composables, Pinia state management, SSR, REST and GraphQL integrations, and real-time features with WebSockets. Skilled in building headless storefronts, optimizing web performance, and covering code with unit and E2E tests.

SKILLS

Vue Ecosystem: Vue 3, Vue 2, Nuxt 3/4, Composition API, Composables, Options API, Pinia, Vuex, Vue Router, SSR
Core Technologies: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, Python
Styling & UI: Tailwind CSS, BEM, Responsive Design, Cross-Browser Compatibility
APIs & Data: REST API, GraphQL, Axios, WebSockets, Firebase
Build & Tools: Vite, Webpack, Git, GitHub, Cloudflare Workers, Google Apps Script, Figma
E-commerce & Analytics: Shopify Storefront API, Headless Commerce, Shopify Theme Development, Liquid, Amplitude, Meta Pixel, Google Analytics 4 (GA4)
Practices: Component-Based Architecture, Unit & E2E Testing, Authentication, Web Performance (Core Web Vitals), SEO, Code Refactoring

EXPERIENCE

Front-End Developer, JATAPP	07/2026 – 10/2026
<i>TechOps Team Remote DTC health and wellness e-commerce product (NDA)</i>	
• Developed modular buy-box components (bundle selector, purchase plan, subscription interval selection) on a shared JavaScript event contract; delivered a full product page redesign • Built a Cloudflare Workers event pipeline that received pre-checkout events, processed them at the edge, and forwarded them to analytics destinations • Led an analytics migration to custom Amplitude events with cross-domain identity stitching (device_id / user_id), and designed event schemas with product analysts • Implemented front-end eligibility checks for a free gift in cart and checkout, and filtered gift items out of Meta Pixel events to prevent duplicate events and inflated values	
Front-End Engineer (Vue / Nuxt, Shopify), RANKBERRY	09/2024 – 06/2026
<i>Remote Front-end development for e-commerce clients</i>	
• Developed reusable Vue components and page layouts with Nuxt • Integrated dynamic content and APIs into headless and SSR applications • Built reusable composables and typed Vue/Nuxt components with TypeScript to share logic across pages and projects • Covered components and key user flows with unit and E2E tests • Customized and extended Shopify themes, building Online Store 2.0 sections that merchants configure in the theme editor • Delivered responsive, cross-browser layouts for desktop and mobile with attention to page speed (Core Web Vitals) • Kept a clean, modular codebase with Vue Composition API, JavaScript, and SCSS, reusing components across client projects	

Front-End Engineer (Vue / Nuxt, Shopify), Ecom-X Company

12/2023 – 08/2024

Remote | E-commerce interfaces and headless storefronts with Vue.js and Nuxt

- Built reusable UI components and sections with Vue 3, Composition API, and Tailwind CSS
- Integrated the Shopify Storefront API into a headless Nuxt 3 storefront for dynamic product rendering with GraphQL data fetching
- Implemented real-time features with WebSockets in a modular Nuxt 3 and Vuex architecture
- Collaborated with backend and UI/UX teams on feature planning and delivery

Frontend Developer (Vue / Nuxt), Freelance

01/2022 – 11/2023

Remote | Web applications, headless storefronts, and landing pages

- Built a headless storefront with Nuxt 3, Pinia, and the Shopify Storefront API
- Automated product and order sync with Google Apps Script, Firebase, and Telegram Bot API
- Delivered 15+ responsive landing pages with Webpack and Gulp, reaching Lighthouse scores of 90+

PROJECTS

Marketplace Startup (NDA)

07/2023 – 11/2023

Vue 3, Nuxt 3, Pinia, Axios, Tailwind CSS, Composition API

Built the front end of a marketplace: authorization and session handling, buyer and seller accounts with shared state in Pinia, product management via REST API, and the purchase flow.

Legal Support Platform (NDA)

05/2023 – 07/2023

Vue, Vuex, GraphQL, WebSockets, Tailwind CSS

Developed 4 pages including the client area, migrated components from the Options API to the Composition API, and optimized existing code.

Universal Amplitude Tracking App for Shopify (NDA)

07/2026 – 10/2026

JavaScript, Shopify App, Theme App Extension, Amplitude

Built an extension-only Shopify app (theme app embed) that tracks storefront events through HTML data attributes with no theme code changes. Tested across multiple stores.

E-commerce Store Migration (Freelance)

01/2023 – 05/2023

Python, JavaScript, Shopify, SCSS

Migrated a Ukrainian textile store from ASPX to Shopify: scraped and imported 1,000+ products, collections, and images with Python and built a custom responsive theme. Launched within 1.5 months; bounce rate dropped by 35% and conversion rate grew by 20%.

EDUCATION & COURSES

Nuxt.js and Vue.js Fundamentals, Udemy

05/2023 – 06/2023

Front-End Developer Course, Ciklum Academy

03/2022 – 05/2022

Front-End Development, Beetroot Academy

11/2021 – 01/2022

LANGUAGES

Ukrainian: Native | English: A2 (Pre-Intermediate)
