SUMMARY

Front-end Developer with 3+ years of experience building fast, scalable, and maintainable web applications using Vue.js and Nuxt. Specialized in eCommerce solutions, including custom Shopify theme development and headless storefronts. Proficient in API integrations (GraphQL/REST), Liquid, and automation of data workflows. Focused on delivering performant interfaces and seamless user experiences.

PROJECTS

Headless Shopify Storefront with Vue/Nuxt, Remote
02/2024 – 03/2024

• Developed a dynamic product catalog with filtering, variant selection, and rich PDPs for improved user navigation and conversion
• Customized storefront using **Liquid**, ensuring a seamless and responsive shopping experience across devices
• Integrated secure payment methods and optimized mobile UI for performance and accessibility
• Applied advanced **SEO techniques** — clean URLs, meta tags, structured data — to boost search visibility
• **Result:** Launched a stable store with a smooth checkout flow and **90+ Google PageSpeed score**

Shopify Migration — Textile Store, Ukraine
01/2023 – 05/2023

Migrated an ecommerce store from ASPX to Shopify with full product, image, and collection extraction and custom theme development.

- Successfully scraped and imported over 1,000 products and images using Python tools
- Built a responsive Shopify theme with Liquid, SCSS, and JS
- Customized metafields, filters, and navigation
- Outcome: Store was fully launched within 1.5 months; bounce rate dropped by 35%; increased conversion rate by 20%

EDUCATION & COURSES

Advanced Shopify & Liquid Customization, Online
06/2024 – 08/2024 | Online

Learned advanced theme architecture, performance optimization, metafields setup, and deep Liquid customization. Built custom sections, dynamic templates, and multilingual- ready storefronts.

WORK EXPERIENCE

RANKBERRY, Front End Engineer (Shopify E-Commerce | Vue / Nuxt)
12/2023 – Present | Remote

Focused on building performant and maintainable front-end solutions using Vue and Nuxt.

• Developed reusable Vue components and page layouts with Nuxt.js
• Integrated dynamic content and APIs for headless and SSR applications
• Ensured cross-browser compatibility and responsive design across breakpoints
• Maintained a clean, modular codebase using Vue Composition API, JavaScript, and SCSS

Ecom-X Company, Front End Engineer (Shopify E-Commerce) with automation expertise
12/2023 – 12/2024 | Ukraine

Development of modern eCommerce user interfaces on the Shopify platform using Vue.js and Nuxt.js.

• Built reusable UI components and dynamic sections using Vue 3, Composition API, and TailwindCSS
• Integrated Shopify Storefront API to enable real-time product rendering in headless setups
• Utilized GraphQL for efficient data fetching and improved performance
• Structured front-end logic with Nuxt 3 and Vuex (or Pinia) in a scalable, modular architecture
• Actively collaborated with back-end and design teams to deliver cohesive, conversion-driven features

Freelance / Self-employed,
Frontend Developer (Vue / Shopify)
01/2022 – Present | Remote

Custom eCommerce development and platform migration for Shopify-based stores

• Migrated a legacy ASPX store to Shopify for a Ukrainian textile brand — scraped and imported 1,000+ products, collections, and media assets
• Built a headless storefront with Nuxt 3, Pinia, and Shopify Storefront API
• Developed and customized Shopify themes using Liquid, TailwindCSS, and JavaScript
• Automated product and order sync using Google Apps Script, Firebase, and Telegram Bot integration
• Delivered 15+ responsive, high-converting landing pages using Webpack and Gulp

Course: Front-end Development, Beetroot Academy
11/2021 – 12/2022 | Online
Gained a deep understanding of core frontend technologies such as HTML, CSS, and JavaScript, forming a solid foundation for web development.

Front-end Developer Courses, Online Academy Ciklum
03/2022 – 05/2022 | Online
Thanks to this course, I became ready to create interactive interfaces and build full-fledged websites, from layout to hosting.

Web Developer Training, WAYUP Academy
2020 – 2021 | Online
Completed practical assignments and projects that simulated real-world development. Gained experience in Git, GitHub, and team collaboration workflows.

KEY ACHIEVEMENTS

Shopify migration of legacy ASPX store
Migrated 20k+ products, images, and collections into Shopify via custom Python scraper. Improved store speed and UX, resulting in a 20% conversion rate increase.

Headless storefront with Nuxt 3 + Shopify
Built fast, modular frontend using Nuxt 3 and Storefront API. Reduced load time by 50% and enabled dynamic content control via Shopify Admin.

Reusable Shopify theme development
Created custom Liquid theme with metafields, dynamic sections, and responsive layout. Reduced future dev time by 40% and enabled non-dev content management.

Landing page performance optimization
Used Webpack and Gulp to build responsive landing pages with optimized assets. Achieved 9095 Lighthouse scores and faster SEO indexing.
