SUMMARY

Shopify Frontend Engineer with 4+ years of experience building custom Shopify themes, headless storefronts, and e-commerce analytics. Most recently developed a high-traffic DTC Shopify storefront at JATAPP: custom Liquid theme components, subscriptions (Recharge), cart logic, and end-to-end Amplitude tracking across storefront and checkout via Shopify Web Pixels. Strong in Vue 3 and Nuxt for headless commerce with the Shopify Storefront API, real-time features over WebSockets, and edge logic on Cloudflare Workers, plus store migrations and data automation.

SKILLS

- Programming Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, Liquid, Python
- Shopify:** Shopify Theme Development, Shopify Plus, Shopify CLI, Storefront API, Admin API (GraphQL, REST), Online Store 2.0, Checkout Extensibility, Metafields, Theme App Extensions, Web Pixels, Recharge, Loop Subscriptions
- Frameworks:** Vue 3, Nuxt 3/4, Composition API, Pinia, Vuex, Tailwind CSS
- Analytics:** Amplitude, Meta Pixel, Google Analytics 4 (GA4), Event Tracking, Cross-Domain Tracking
- Tools & Platforms:** Git, GitHub, Vite, Webpack, Cloudflare Workers, WebSockets, GraphQL, Firebase, Google Apps Script, Figma
- Practices:** Web Performance (Core Web Vitals), Responsive Design, Cross-Browser Compatibility, SEO, Store Migration

EXPERIENCE

- Front-End Developer (Shopify), JATAPP**

07/2026 – 10/2026

TechOps Team | Remote | DTC health and wellness storefront on Shopify (NDA).

- Led a large-scale analytics migration from legacy tracking snippets to custom Amplitude events across storefront and checkout, built on Shopify Web Pixels with cross-domain identity stitching (device_id / user_id) via cart attributes
 - Designed event schemas with product analysts, aligned checkout events with the analytics spec, and resolved silent pixel failures caused by sandbox storage and consent state
 - Built a Cloudflare Workers event pipeline that received pre-checkout storefront events, processed them at the edge, and forwarded them to analytics destinations
 - Implemented front-end eligibility checks for a free gift in cart and checkout, and filtered gift line items out of Meta Pixel cart events so only physical products were counted, preventing duplicate events and inflated values
 - Developed modular PDP buy-box components (bundle selector, purchase plan, subscription interval selection) on a shared JavaScript event contract; delivered a full PDP redesign for a flagship product
 - Migrated subscriptions from Loop to Recharge, including active subscribers, in coordination with both providers' support teams
- Front-End Engineer (Shopify), RANKBERRY**

09/2024 – 06/2026

Remote | Shopify theme customization and front-end development for e-commerce clients

- Customized and extended Shopify themes for e-commerce clients, delivering new page templates, Liquid sections, and storefront UI improvements
 - Built Online Store 2.0 sections and blocks with configurable schema settings, so merchants manage content in the theme editor without developer help
 - Developed reusable UI components and interactive JavaScript features integrated into existing client themes
 - Delivered responsive, cross-browser layouts for desktop and mobile storefronts with attention to page speed (Core Web Vitals)
 - Kept a clean, scalable codebase with Liquid, JavaScript, and SCSS, reusing components across client projects

Front-End Engineer (Shopify, Vue / Nuxt), Ecom-X Company

12/2023 – 08/2024

Remote | E-commerce interfaces and headless storefronts on Shopify

- Built reusable UI components and sections with Vue 3, Composition API, and Tailwind CSS
- Integrated the Shopify Storefront API for dynamic product rendering with GraphQL data fetching
- Implemented real-time features with WebSockets in a modular Nuxt 3 and Vuex architecture
- Collaborated with backend and UI/UX teams on feature planning and delivery

Frontend Developer (Vue / Shopify), Freelance

01/2022 – 11/2023

Remote | Custom e-commerce development and platform migrations for Shopify stores

- Built a headless storefront with Nuxt 3, Pinia, and the Shopify Storefront API
- Automated product and order sync with Google Apps Script, Firebase, and Telegram Bot API
- Delivered 15+ responsive landing pages with Webpack and Gulp, reaching Lighthouse scores of 90+

PROJECTS

Universal Amplitude Tracking App for Shopify (NDA)

07/2026 – 10/2026

Shopify App, Theme App Extension, JavaScript, Amplitude

Built an extension-only Shopify app (theme app embed) that tracks storefront events through HTML data attributes with no theme code changes. Tested across multiple stores.

Stony: Shopify Store for Boards and Gear (Freelance)

02/2024 – 03/2024

Shopify, Liquid, JavaScript, SCSS, SEO

Built a dynamic product catalog with filtering, variant options, and detailed PDPs in Liquid; implemented a mobile-friendly UI and SEO best practices (clean URLs, meta tags, structured data). Launched with a stable checkout flow and a Google PageSpeed score of 90+.

Shopify Migration: Ukrainian Textile Store (Freelance)

01/2023 – 05/2023

Shopify, Liquid, Python, SCSS, JavaScript

Migrated a store from ASPX to Shopify: scraped and imported 1,000+ products, collections, and images with Python, built a custom responsive theme, and set up metafields, filters, and navigation. Launched within 1.5 months; bounce rate dropped by 35% and conversion rate grew by 20%.

Marketplace Startup (NDA)

07/2023 – 11/2023

Vue 3, Nuxt 3, Pinia, Axios, Tailwind CSS, Composition API

Built the front end of a marketplace: authorization, buyer and seller accounts, product management via REST API, and the purchase flow.

Legal Support Platform (NDA)

05/2023 – 07/2023

Vue, Vuex, GraphQL, WebSockets, Tailwind CSS

Developed 4 pages including the client area, migrated components from the Options API to the Composition API, and optimized existing code.

EDUCATION & COURSES

Advanced Shopify & Liquid Customization, Online Course

06/2024 – 08/2024

Nuxt.js and Vue.js Fundamentals, Udemy

05/2023 – 06/2023

React Front-End Course, Space IT Academy

04/2022 – 07/2022

Front-End Developer Course, Ciklum Academy

03/2022 – 05/2022

Front-End Development, Beetroot Academy

11/2021 – 01/2022

Web Developer Training, WAYUP Academy

12/2020 – 01/2021

LANGUAGES

Ukrainian: Native | English: A2 (Pre-Intermediate)
