Scripting & Automation

Python (scraping) · Google Apps Script

Integrations

Google Sheets API · Telegram Bot API · Firebase · GA4

Dev Tools

Git · GitHub · VSCode · Figma

SUMMARY

Frontend Developer with 3+ years of experience specializing in Shopify and Vue/Nuxt-based projects. Skilled in custom Shopify theme development, integration of third-party apps, and headless storefronts using Nuxt.js. Confident in scraping and automating data pipelines during store migrations. Passionate about building performant, maintainable, and conversion-oriented ecommerce interfaces.

WORK EXPERIENCE

RANKBERRY — Remote

Front End Engineer (Shopify E-Commerce | Vue / Nuxt) — 12/2023 - Present

Focused on Shopify theme customization and frontend enhancements using Liquid.

- Developed custom **Shopify templates**, dynamic **Liquid sections**, and reusable UI components
- Integrated components into Shopify themes for interactive UI elements
- Ensured cross-browser compatibility and responsive layout across devices
- Maintained clean and scalable codebase using **Liquid**, **JavaScript**, and **SCSS**

Ecom-X Company — Ukraine

Front End Engineer (Shopify E-Commerce) — 12/2023 - 12/2024

Development and implementation of user interfaces for ecommerce solutions on the Shopify platform, using Vue.js and Nuxt.js technologies.

- Built reusable UI components and sections using **Vue 3**, **Composition API**, and **TailwindCSS**
- Integrated Shopify Storefront API for dynamic product rendering
- Implemented GraphQL-based data fetching for performance optimization
- Worked with **Vuex**, **WebSockets**, and **Nuxt 3** in a modular architecture
- Participated in feature planning and collaborated with backend and UI/UX teams

Freelance / Self-employed — Remote

Frontend Developer (Vue / Shopify) — 01/2022 - Present

Custom ecommerce development and platform migration projects for Shopify-based stores.

- Migrated legacy store from ASPX to Shopify for a Ukrainian textile brand; scraped 1,000+ products, collections, and media
- Developed headless storefront using **Nuxt 3**, **Pinia**, and **Shopify Storefront API**
- Created and customized Shopify themes with **Liquid**, **TailwindCSS**, and **JavaScript**
- Automated product and order syncing via **Google Apps Script**, **Firebase**, and **Telegram Bot**
- Built 15+ responsive landing pages using **Webpack** and **Gulp**

PROJECTS

Shopify Migration — Textile Store

Ukraine 01/2023 - 05/2023

Migrated an ecommerce store from ASPX to Shopify with full product, image, and collection extraction and custom theme development.

- Successfully scraped and imported over 1,000 products and images using Python tools
- Built a responsive Shopify theme with Liquid, SCSS, and JS
- Customized metafields, filters, and navigation
- *Outcome:* Store was fully launched within 1.5 months; bounce rate dropped by 35%; increased conversion rate by 20%

Stony E-Commerce Boards — Shopify Customization

Remote 02/2024 - 03/2024

Developed and customized an ecommerce store for a brand selling boards and gear. Focused on building a dynamic catalog and polished UX.

- Built product catalog with filtering, variant options, and detailed PDPs using **Liquid**
- Implemented secure payment integration and mobile-friendly UI
- Applied SEO best practices (clean URLs, meta tags, structured data)
- *Outcome:* Store successfully launched with stable conversion flow and high Google PageSpeed score (90+)

LANGUAGES

UKRAINIAN	**Native**
ENGLISH	**Intermediate**
POLISH	**Intermediate**

INTERESTS

- **Go skiing / Swimming / Read books / Play computer games**

WORK EXPERIENCE

Web Studio (NDA)

Remote

Frontend Developer (Landing Pages / Vue) 07/2021 - 12/2021

Short-term contracts for web agencies and ecommerce brands.

- Converted Figma designs into responsive landing pages
- Used **Gulp/Webpack** to automate builds and optimize assets
- Improved page performance and layout stability (Lighthouse 90+ scores)

EDUCATION & COURSES

Advanced Shopify & Liquid Customization

Online

06/2024 - 08/2024

Learned advanced theme architecture, performance optimization, metafields setup, and deep Liquid customization. Built custom sections, dynamic templates, and multilingual-ready storefronts.

Front-end Developer Courses

Online Academy Ciklum

03/2022 - 05/2022

Thanks to this course, I became ready to create interactive interfaces and build full-fledged websites, from layout to hosting.

Course: Front-end Development

Beetroot Academy

11/2021 - 01/2022

Gained a deep understanding of core frontend technologies such as HTML, CSS, and JavaScript, forming a solid foundation for web development.

Web Developer Training

WAYUP Academy

2020 - 2020

Completed practical assignments and projects that simulated real-world development. Gained experience in Git, GitHub, and team collaboration workflows.

KEY ACHIEVEMENTS

- **Shopify migration of legacy ASPX store**
  Migrated 20k+ products, images, and collections into Shopify via custom Python scraper. Improved store speed and UX, resulting in a +20% conversion rate increase.
- **Headless storefront with Nuxt 3 + Shopify**
  Built fast, modular frontend using Nuxt 3 and Storefront API. Reduced load time by 50% and enabled dynamic content control via Shopify Admin.
- **Reusable Shopify theme development**
  Created custom Liquid theme with metafields, dynamic sections, and responsive layout. Reduced future dev time by 40% and enabled non-dev content management.
- **Landing page performance optimization**
  Used Webpack and Gulp to build responsive landing pages with optimized assets. Achieved 90–95 Lighthouse scores and faster SEO indexing.
